

theCessnaCitationX

Make your own speed records at Mach .92 and fly in the fastest business jet ever built. Time has never been so valuable. It's never been worth so much money. And it's never been so highly prized. We're living in a day when increasing numbers of us are treasuring the quality of our life. The lines are becoming blurred between earning time and personal time. Typically, most of us have to steal hours, days and weeks from one category to make more for the other. When you can depart at 7 a.m., have three meetings in three different cities, and come back in time for dinner, it makes a difference. Imagine what the Citation X will do for you.
